

About me

Welcome to my website! I am Syeda Jahirin Aktari, a Ph.D. candidate (ABD) in Economics at Southern Illinois University Carbondale. I am on the job market for the 2026-2027 academic year.

My research interests include microeconomics, economics of education, industrial organization, and causal inference, with a focus on the effects of higher education policy on political participation and gender-attitude outcomes, as well as the influence of privacy measures on pricing strategy in spectrum-sharing markets. I used causal inference methods and the novel World Values Survey (WVS) dataset for my empirical work.

My experience working as an instructor and as a teaching assistant prepares me to teach core and elective economics courses, including microeconomics, macroeconomics, health economics, urban economics, environmental economics, and the history of economic thought, in both in-person and online teaching modalities. Additionally, I have experience of assisting with several management courses.

You can reach me at syedajahirin.aktari@siu.edu or find a current copy of my [CV below](#).
